INTRODUCING

Under Carvas

A unique under canvas experience designed for complete privacy and immersion in this magical eco-system. Long distance walking adventures that connect you deeply with the environment around you. Immersive experiences that uncover the secrets of this eco-system. Adventures on horseback that allow you to explore gently and quietly the harder to reach places. And for those who like to push the boundaries and see even more, we can offer private heli safaris to North Kenya where a community led elephant sanctuary and scenic excursions to Lake Turkana will add a jolt of other worldliness to your stay. This small and private camp is all about bringing you into the present, awaking your consciousness and connecting you to a new rhythm.

Sleeping

Just four spacious and light bedroom tents decorated with a natural, organic aesthetic to create a feeling of calm and offering high levels of comfort. We like the bush to speak for itself, with Mother Nature providing the best bit of luxury. There is nothing that quite compares to falling asleep with just canvas between you and the wilderness. Waking up at dawn to the smell of wood smoke and hot chai will make this adventure feel like home.

Enting

Organic food straight from our own garden and meat from the land itself. Open fire cooking and innovative menus that celebrate our climate and fresh food heritage. All cooked in our very own bush kitchen with cast iron pans, hand carved wooden bowls and plenty of local flavor. We will make sure your coffee is hot and your bread is always fresh!

Doing

The ideal, authentic safari base from which to explore this 14,000 acre conservancy: from the rivers systems to the plains to the waterfall in the North of the property. Whether you go by foot, by car, by horse or by helicopter, your days will be filled with extraordinary experiences led by some very special people. We can set up rods at the river, picnics under the acacia and early morning yoga sessions, just let us know and we can create it for you.
